Manufacturer Safety recall issued

- NHTSA #16V-244
- Recall #R1607 PTH LEF NV TX OCS NTB16-054
- Status: Remedy Available

Locate an authorized Nissan dealer near you to obtain more information about this recall

⊖ **Learn more about this recall**

Description: The Occupant Classification System (OCS) is designed to classify the size and weight of the front seat passenger and, under certain conditions, automatically turn OFF the passenger air bag. The OCS system is designed to only deploy the front passenger airbag when the front passenger seat is occupied by an adult. In the affected vehicles, the OCS software may incorrectly classify the passenger seat as empty when it is occupied by an adult. If the OCS does not detect an adult occupant in the passenger seat, the passenger airbag would be deactivated.

Failure of the passenger airbag to deploy during a crash (where deployment is warranted) could increase the risk of injury to the passenger.

Remedy: Nissan is currently awaiting parts to remedy the affected vehicles. Nissan will send you a second letter, when parts are available, asking you to bring your vehicle to a Nissan dealer for the remedy at that time. This repair is free of charge for parts and labor. In the meantime, if you believe there is an issue with the OCS system in your vehicle, you may bring your vehicle into the nearest Nissan dealer for service.

Manufacturer Safety recall issued

- NHTSA #21V-020
- Recall #PC786 PTHFR STP LMP SWTH NTB21-003
- Status: Remedy Available

Locate an authorized Nissan dealer near you to obtain more information about this recall

⊖ **Learn more about this recall**

Description: Due to the location of the stop lamp switch on the brake pedal, a chattering condition may occur in the stop lamp relay. Under certain driving conditions, such as frequent stop-and go driving with repeated brake pedal input, the chattering can degrade the relay contact service life.

Over time, this may lead to the stop lamp relay sticking in the ON position. As a result, customers may experience one or more of the following symptoms lack of power, continuous stop lamp illumination, ability to shift the vehicle out of park without depressing the brake pedal, engine starting without depressing the brake pedal These symptoms could potentially increase the risk of a crash or rollaway.

Remedy: Dealers will inspect the stop lamp switch position and set the gap to required specification. For early model year 2013 affected vehicles (prior to November 9, 2012), dealers will inspect the stop lamp switch position, set gap to required specification, and replace the stop lamp relay with a new one. For late model year 2013 to 2015 vehicles (produced after November 9, 2012, dealers will swap the stop lamp switch on the brake pedal with the Automatic Speed Control Device (ASCD) switch location on the brake pedal and then replace the stop lamp relay with a new one. This free service should take up to one (1) hour to complete but your Nissan dealer may require your vehicle for a longer period of time based upon their work schedule.

MILEAGE INCONSISTENCY

The mileage reported here conflicts with this vehicle's odometer history. Ask a mechanic or the seller to confirm the actual mileage - this entry may just be a clerical error.

06/23/2022 Nissan North America
Inc.

Manufacturer Safety recall issued

- NHTSA #22V420
- Recall #R22A2 PATH HOOD LOCK ASSY NTB22053

-Status: Remedy Not Yet Available

Locate an authorized Nissan dealer near you to obtain more information about this recall

⊖ [Learn more about this recall](#)

Description: ON CERTAIN 2013-2016 PATHFINDER VEHICLES, DUST OR DIRT CONTAMINATION MAY ACCUMULATE ON AND AROUND THE SECONDARY LATCH LEVER PIVOT JOINT. OVER TIME, THE BUILD-UP OF CONTAMINATION, COMBINED WITH A LACK OF PROPER INSPECTION AND MAINTENANCE OF THE SECONDARY LATCH (AS DESCRIBED IN THE OWNER S MANUAL), CAN CREATE MECHANICAL BINDING THAT COULD CAUSE THE LEVER TO REMAIN IN THE OPEN POSITION AFTER IT HAS BEEN DISENGAGED. IN ADDITION, THIS CONTAMINATION CAN SCRATCH THE SECONDARY LATCH S PROTECTIVE ANTI-CORROSION COATING, ALLOWING CORROSION OF THE BARE METAL IN THE PIVOT JOINT.

THE SECONDARY LATCH LEVER ACTUATES THE SECONDARY LATCH. IN SUCH CASES WHERE THE SECONDARY LATCH REMAINS IN THE OPEN POSITION, IF THE PRIMARY HOOD LATCH IS INADVERTENTLY RELEASED OR THE HOOD IS NOT CLOSED PROPERLY AFTER ENGINE SERVICE, THE SECONDARY LATCH MAY NOT HOLD THE HOOD CLOSED, AS DESIGNED, WHILE THE VEHICLE IS IN MOTION. IF THIS CONDITION OCCURS, THE HOOD MAY OPEN WITHOUT WARNING AND OBSTRUCT THE DRIVER S FORWARD VIEW, INCREASING THE RISK OF CRASH.

Remedy: NISSAN WILL MAIL AFFECTED OWNERS AN INTERIM OWNER LETTER THAT WILL INSTRUCT THE OWNERS HOW TO PROPERLY INSPECT THE HOOD LOCK AND SECONDARY LATCH FOR PROPER WORKING CONDITION (NO STICKING). IF THE LEVER MOVES FREELY, THE OWNER CAN CLEAN AND CONDITION THE LEVER PER THE OWNER S MANUAL GENERAL MAINTENANCE REQUIREMENTS IN SECTION 8 MAINTENANCE AND DIY . IF THE LEVER DOES NOT MOVE FREELY, THE CUSTOMER WILL BE INSTRUCTED TO TAKE THEIR VEHICLE TO A NISSAN DEALER. THE DEALER WILL INSPECT THE HOOD LOCK AND SECONDARY LATCH AND, IF FUNCTIONING PROPERLY, CLEAN AND CONDITION BY APPLYING LUBRICANT. IF EITHER OF THESE COMPONENTS DO NOT FUNCTION PROPERLY, THE HOOD LOCK AND/OR SECONDARY LATCH WILL BE REPLACED.

Have Questions? Consumers, please visit our Help Center at www.carfax.com. Dealers or Subscribers, please visit our Help Center at www.carfaxonline.com.

Glossary

First Owner

When the first owner(s) obtains a title from a Department of Motor Vehicles as proof of ownership.

Manufacturer Buyback or Lemon

A DMV or a state agency marks an official document or issues a Manufacturer Buyback/Lemon title when a vehicle has been repurchased by the manufacturer. Not all states issue manufacturer buyback titles and the specific requirements for a lemon law vehicle vary by state.

Manufacturer Recall

Automobile manufacturers issue recall notices to inform vehicle owners of a safety defect or failure to meet minimum federal safety or emissions standards. Manufacturer recalls are repaired at no cost to the customer.

Mileage Inconsistency

If an odometer reading is less than a previous reading but CARFAX is uncertain whether the discrepancy is a rollback or a clerical error, then CARFAX calls it a "Mileage Inconsistency". In this case, you should verify the mileage with your dealer or a qualified mechanic.

New Owner Reported

When a vehicle is sold to a new owner, the Title must be transferred to the new owner(s) at a Department of Motor Vehicles.

Ownership History

CARFAX defines an owner as an individual or business that possesses and uses a vehicle. Not all title transactions represent changes in ownership. To provide estimated number of owners, CARFAX proprietary technology analyzes all the events in a vehicle history. Estimated ownership is available for vehicles manufactured after 1991 and titled solely in the US including Puerto Rico. Dealers sometimes opt to take ownership of a vehicle and are required to in the following states: Maine, Massachusetts, New Jersey, Ohio, Oklahoma, Pennsylvania and South Dakota. Please consider this as you review a vehicle's estimated ownership history.

Title Issued

A state issues a title to provide a vehicle owner with proof of ownership. Each title has a unique number. Each title or registration record on a CARFAX report does not necessarily indicate a change in ownership. In Canada, a registration and bill of sale are used as proof of ownership.

Vehicle Reacquired

A vehicle that has been repurchased by the manufacturer. Manufacturers may choose to buy the vehicle back from a customer after repeated repair attempts or to promote customer satisfaction.
