Recall #: 69PZ | PODS Recall Date: 2024 Jun 25

Recall Description

A wire with a contact fault may cause the Passenger Occupant Detection System (PODS) to detect a malfunction and switch off the passenger airbag, even though the seat may be occupied. In a crash with frontal airbag deployment, there would be an increased risk of injury to the occupant seated in the front passenger seat if the passenger frontal airbag is switched off or not working. Should a malfunction occur, vehicle occupants will be alerted by illumination of the airbag warning light, an acoustic warning sound, an error message displayed in the instrument cluster and by the status of the Passenger Airbag OFF indicator light. If this happens, owners are advised to make an appointment with an authorized Volkswagen dealer to have the vehicle inspected without delay.

Remedy

Replace the PODS sensor mat and wiring harness.
