## Open Recalls

Recall #: WTK-71 | Wiper Motor Cover Recall (2010-13 Legacy/Outback) Recall Date: 2016 Oct 03

### Recall Description

On certain vehicles a manufacturing defect could cause the windshield wipers to become inoperable. If an obstruction (such as snow or ice in the cowl area of the windshield) prevents the wipers from returning to the "park" position when wipers are turned off the wiper arms would be forced to "park" at a higher than intended position on the windshield. The wiper arms will continuously attempt to return to the normal park position generating an excessive amount of electrical current in the wiper motor bottom cover possibly resulting in overheating. This could result in the windshield wipers becoming inoperable or a possible fire in the bottom cover area of the wiper motor. These issues could impair the driver's visibility and increase the risk of a crash causing injury and/or damage to property.

### Remedy

To correct this condition Subaru will replace the windshield wiper motor bottom cover at no cost to you.

Recall #: TKC-19 | Front Passenger Airbag Inflator Recall Date: 2019 Jan 09

### Recall Description

On certain vehicles long-term exposure to high absolute humidity and temperature combined with high temperature cycling may eventually degrade the propellant contained in the passenger-front airbag. This could cause the airbag to deploy with more force than normal. If the airbag inflator ruptures fragments could be propelled toward vehicle occupants or cause damage to the airbag assembly preventing its proper function.

### Remedy

Owners will be notified by mail and instructed to take their vehicle to a dealer to have the passenger-front airbag inflator replaced. Note: The Canadian climate results in the propellant degrading slowly. This recall is being conducted as a precaution to address future risk. It is expected that all airbag inflators will be replaced before their function would be affected.
