Open Recalls

Recall #: N202301950 | Loss of Power Assist, Steering-Gear Motor Bolts Broken Recall Date: 2020 Jun 25

Recall Description

General Motors has decided to conduct a safety recall on certain 2013-2016 model year Cadillac ATS, 2014-2016 Cadillac CTS, and 2016-2017 Chevrolet Camaro vehicles, in regions not previously recalled under GM Recall 18285 (Transport Canada Recall 2018-463). These vehicles may have a condition in which the power steering gear motor could separate from the steering gear housing due to corrosion of the attaching bolts. If the motor separates, power steering assist is lost or reduced, steering control can be maintained but would require an increased effort as the system will revert to manual steering. Vehicles in the provinces of New Brunswick, Nova Scotia, Newfoundland and Labrador, Prince Edward Island, Ontario, and Quebec were previously recalled for this condition.

Remedy

Dealers will replace the bolts that attach the electric power steering motor to the steering gear and add a protective wax coating to each bolt and the seam around the electric power steering motor. If the bolts cannot be removed due to corrosion, the steering gear will be replaced.

This recall was open as of the date/time that this report was generated. For more information, or to find out if the recall has been closed, please contact CADILLAC or visit [GM's website](#).
