## Open Recalls

Recall #: N150299 | DRIVER SIDE REAR PILLAR INTERIOR FIRES Recall Date: 2015 Sep 03

1G6AA5RXXE0183805

**Recall Description**

General Motors has decided that a defect which relates to motor vehicle safety exists in certain 2013-2016 model year ATS sedan vehicles. These vehicles have a coil antenna module that powers the rear defogger system located in the driver side rear pillar. In certain of these vehicles, the coil antenna module may generate significant temperatures if the module is subjected to excessive cycling or continuous operation and the module was manufactured with critically weak terminal connectivity.

**Remedy**

Dealers will reflash the Electronic Climate Control (ECC) module to remove the automatic rear defogger "on" function that occurs as a result of manual or remote start of the vehicle. 2013 models also have a "continuous on" feature (enabled at highway speeds in low temperatures) that will also be disabled. The base functionality of the rear defogger will not be lost. The customer will retain the ability to turn on the function manually from inside the vehicle. This service will be free of charge.

Recall #: N150119 | SUNROOF SWITCH MVSS 118 COMPLIANCE Recall Date: 2015 Feb 24

**Recall Description**

General Motors has decided that certain 2013 - 2015 model year Cadillac ATS vehicles equipped with power-operated roof panel systems fail to conform to Federal Motor Vehicle Safety Standard (FMVSS) No. 118, Power-Operated Window, Partition, and Roof Panel Systems. The roof panels in these vehicles will auto-close when the non-recessed portion of the "Slide" or "Tilt" switches are pressed and the roof panel is open. Because these switches are not fully recessed, they can be actuated when performing the test procedure set forth in S6(a) of FMVSS No. 118, which results in the roof panel auto-closing when open.

**Remedy**

Dealers will replace the roof console accessory switch trim plate free of charge.
