Recall #: U65 | 14-18MY WD/WK CAN BUS Recall Date: 2018 Jun 21

Recall Description

The fault handling strategy of the Engine Control Module (ECM) or PCM software in the affected vehicles does not remove positive torque requests from the engine controller if the CAN-C bus stops communicating while the cruise control is requesting positive torque.

Remedy

Inspect the software level of the ECM/PCM and, if necessary, perform a software flash on the ECM/PCM of affected vehicles to improve the fault handling so that if the CAN-C bus does stop communicating any active torque requests will be cleared.

This recall was open as of the date/time that this report was generated. For more information, or to find out if the recall has been closed, please contact JEEP or visit [Jeep's website](#).
