## Open Recalls

Recall #: N232431050 | Automatic Exterior Lights May Not Activate As Required    Recall Date: 2024 Feb 01

### Recall Description

General Motors has decided that certain vehicles listed above may not conform to sections (19), (28), and (30)(c) of Canada Motor Vehicle Safety Standard (CMVSS) No. 108, "Lighting Systems and Reflective Devices". The standard requires daytime running lights (DRLs) to be active

if the vehicles are operated at the prescribed speed or have traveled the prescribed distance, unless lower beam headlamps are activated. Lower beam headlamps should automatically reactivate at a prescribed lux value during dark/night conditions. In these vehicles, both the DRLs and lower beam headlamps may not activate under the prescribed conditions when the manual lighting switch is in OFF or PARKING LAMP mode. During that time, the vehicle could be less visible, increasing the risk of a crash.

**Remedy**

Dealers will update the software in the vehicles' Body Control Module (BCM) to correct the condition.

This recall was open as of the date/time that this report was generated. For more information, or to find out if the recall has been closed, please contact CADILLAC or visit [GM's website](https://my.gm.ca/gm/en/recalls). (<https://my.gm.ca/gm/en/recalls>)
