

Vehicle History Report #: 48394035

Report Date: September 11, 2023 | 3:38 PM EDT

Report Status: Complete

## 2015 CHEVROLET SILVERADO K1500 LT

Pickup | 8 Cylinders | Gas

3GCUKRECFG250465

Country of Assembly: Mexico

Last Reported Odometer: 187,172 KM

Accident/Damage Records Found

Last Registered In:  
Ontario (Normal)

28 Service Records Found

No U.S. History Found

5 Open Recalls Found

Not Actively Declared Stolen

No Import Record Found

**Questions?** We're here to help.Visit us at [support.carfax.ca](https://support.carfax.ca)

This vehicle history report is based on information (<https://www.carfax.ca/vehicle-history-data>) that was reported and available to CARFAX Canada as of September 11, 2023 (or once all the data was collected from our data sources and the report was complete). CARFAX Canada draws on billions of data records from thousands of sources across North America, and we receive new historical data records every day. **There may be other information about this vehicle that has not been reported to CARFAX Canada.** When buying a used vehicle, we always recommend using a CARFAX Canada Vehicle History Report, along with a vehicle inspection and test drive, to make an informed decision.

## Vehicle History Report

Accident/Damage

INCIDENT DATE	DETAILS	AMOUNT
2016 May 6	Glenavon, Saskatchewan, Canada	
	Estimate: Not Available   Estimate Date: 2016 Aug 17	\$1,566.80
	Claim: Collision	\$1,566.80
2020 Nov 4	Ontario, Canada	
	<b>Police Reported Accident:</b> Accident reported: moderate damage Vehicle involved in a rear-end collision with another motor vehicle Damage to rear  Claim: Collision	\$7,617.00
2022 Jul 21	Ontario, Canada	
	<b>Police Reported Accident:</b> Accident reported: minor damage Vehicle involved in a sideswipe collision with another motor vehicle Damage to right front	

## Other Damage Records

RECORD DATE	DETAILS	AMOUNT
2016 Sep 6	Saskatchewan, Canada	
	Glass Record	\$0.00
2017 Mar 30	Saskatchewan, Canada	
	Glass Record	\$0.00

## Registration

This vehicle has been registered in the following locations in **Canada** (listed oldest to newest):

- In the province of **Saskatchewan** with **Normal** branding.
- In the province of **Ontario** with **Normal** branding.

**We checked for:** Inspection Required, Normal, Non-repairable, Rebuilt, Salvage and Stolen.

## Open Recalls

**Recall #:** N182156820 | EPS Loss of Steering Assist    **Recall Date:** 2018 Sep 07

### Recall Description

General Motors has decided that a defect which relates to motor vehicle safety exists in certain 2015 model year Chevrolet Silverado LD, Suburban, and Tahoe vehicles; GMC Sierra LD and Yukon vehicles; Cadillac Escalade vehicles. These vehicles may experience a temporary loss of EPS assist followed by a sudden return of EPS assist, particularly during low-speed turning maneuvers. The loss and sudden return of EPS assist typically happens within a 1 second period and is caused by an electrical/software issue.

### Remedy

Dealers will perform a reflash of the EPS module software free of charge.

This recall was open as of the date/time that this report was generated. For more information, or to find out if the recall has been closed, please contact CHEVROLET or visit GM's [website](#).

**Recall #:** N192220470 | **Power Sliding Rear Window Defroster Failures (Canada Only)** **Recall Date:** 2019 Jun 27

#### Recall Description

General Motors has approved a safety recall in Canada for certain 2014-2019 model year Chevrolet Silverado and GMC Sierra vehicles equipped with a power sliding rear window (RPO A48). In some of these vehicles, areas of high electric resistance on the rear defroster circuit, caused, in part, by mechanical stress from opening and closing the rear power window, intrusion of debris, and use of the rear defroster may, over time, generate heat which could melt the areas surrounding the circuit. In rare instances, this heat could cause a non-propagating fire, increasing the risk of property damage or injury.

#### Remedy

Dealers will replace the buss bar covers and the contact cover, and for certain vehicles, will reprogram the HVAC calibration to disable the rear defroster from automatically turning on at keyed start. Please note that the rear defroster will automatically turn on during remote start or by pushing the manual button and is not affected by this calibration. If the rear window or sliding glass assembly appears damaged due to an occurrence of high electrical resistance on the rear defroster circuit, they will also be replaced.

This recall was open as of the date/time that this report was generated. For more information, or to find out if the recall has been closed, please contact CHEVROLET or visit **GM's website**.

**Recall #:** N192217410 | **Reduction in Vacuum Brake Assist – Canada Only** **Recall Date:** 2019 Jun 27

#### Recall Description

General Motors has approved a safety recall in Canada for certain 2017 model year Chevrolet Silverado LD, GMC Sierra LD, Cadillac Escalade, Chevrolet Suburban, Chevrolet Tahoe, and GMC Yukon vehicles, that, in some circumstances, may have a condition in which the engine-mounted mechanical vacuum pump output may decrease over time, decreasing the amount of vacuum/power brake assist. If the vacuum level drops, customers may experience increased brake pedal effort, hard brake pedal, and/or potentially increased stopping distance. The Driver's Information Centre (DIC) "Service brake assist" alert will activate 2-5 minutes after the vacuum level drops, and a Diagnostic Trouble Code (DTC) will also be set. Even where this condition occurs, the hydraulic brake system remains functional. The condition is more prevalent at low speed when softly applying the brakes. Failure to follow recommended oil change intervals could contribute to this condition.

#### Remedy

Dealers are to reprogram the electronic brake control module (EBCM).

This recall was open as of the date/time that this report was generated. For more information, or to find out if the recall has been closed, please contact CHEVROLET or visit **GM's website**.

**Recall #:** N150822 | **SEATBELT LAP ANCHOR TENSIONER CABLE** **Recall Date:** 2016 Apr 11

#### Recall Description

General Motors has decided that a defect which relates to motor vehicle safety exists in certain 2014-2015 model year Chevrolet Silverado 1500 and GMC Sierra 1500 vehicles. The flexible steel cable that connects the driver's seat belt to the outboard side of the seat (the "tensioner cable") can fatigue and separate over time as a result of occupant movement into the driver's seat.

#### Remedy

For used and customer vehicles, dealers will enlarge the side shield opening, install a pusher bracket on the tensioner, and if necessary, replace the tensioner assembly free of charge. For unsold new vehicles, dealers will replace the retractor assembly.

This recall was open as of the date/time that this report was generated. For more information, or to find out if the recall has been closed, please contact CHEVROLET or visit **GM's website**.

Recall #: 2016007 | Frontal Airbag and Pretensioner Non Deploy Recall Date: 2016 Sep 09

#### Recall Description

General Motors has decided that a defect which relates to motor vehicle safety exists in certain 2014-2017 model year Chevrolet Silverado LD, GMC Sierra LD, Buick Encore, Chevrolet Trax, Chevrolet Caprice Police, and Chevrolet Corvette vehicles, 2014-2016 model year Buick Lacrosse, Chevrolet Spark EV, and Chevrolet SS vehicles and 2015-2017 model year Chevrolet Silverado HD, GMC Sierra HD, GMC Yukon, GMC Yukon XL, Cadillac Escalade Cadillac Escalade ESV, Chevrolet Suburban, and Chevrolet Tahoe vehicles. The sensing and diagnostic module (SDM) in these vehicles, which controls airbag and pretensioner deployment, contains a software defect which may prevent the deployment of frontal airbags and pretensioners in certain rare circumstances. If the frontal airbags and seatbelt pretensioners do not deploy when required, there is an increased risk of injury to occupants in a crash.

#### Remedy

Reprogram the SDM with new software that eliminates this defect. In vehicles with any previous deployment events recorded in the SDM, dealers will replace the existing SDM with a new SDM prior to programming and setup. Note: Before replacing the SDM, any airbag related Diagnostic Trouble Codes should be identified, diagnosed, and corrected prior to SDM replacement. Faulty SIR components in need of replacement are unrelated to this safety recall and are not covered under the terms of this safety recall.

This recall was open as of the date/time that this report was generated. For more information, or to find out if the recall has been closed, please contact CHEVROLET or visit **GM's website**.
