Recall #: 8515G | CX-9 LOWER CONTROL ARMS Recall Date: 2015 Sep 14

Recall Description

Water may enter the front suspension ball joint fitting. Driving on roadways during the winter months in areas that use roadway salts can lead to salt and water intrusion into the ball joint, causing corrosion, which can result in looseness of the ball joint in the fitting. As a result of the looseness, a rattle may occur at the lower control arm ball joint. After extended operation in this condition, in the worst case the ball joint and lower control arm may separate.

This recall was open as of the date/time that this report was generated. For more information, or to find out if the recall has been closed, please contact MAZDA or visit Mazda's website.

Recall #: 1317F | PASSENGER AIR BAG INFLATOR Recall Date: 2018 Jan 15

Recall Description

Continued exposure to high levels of absolute humidity may cause the air bag inflator housing to rupture and deploy abnormally in the event of a crash necessitating deployment of the passenger side frontal air bag.

This recall was open as of the date/time that this report was generated. For more information, or to find out if the recall has been closed, please contact MAZDA or visit Mazda's website.
